

## Easy Wordpress Links Tutorial

---

Go To <http://mikeleembruggen.com/techie/easy-wordpress-links/> to download the WP Page Refresh Plugin and the Affiliate Cookie Drop plugin.

**To create a sample redirect page, click the "Add New" link under the Pages dropdown**

You can also do this with Posts. You might like to create a category called "recommends" and then have each Post under that category redirect through your affiliate link.

**Specify a title for your new page**

Note: You may want to click the "Edit" option on the permalink setting and delete the dash so your permalink looks something like: <http://mikeleembruggen.com/productname/>

**Note: Make sure you have the WP Page Refresh and Affiliate Cookie Drop Plugins checked under "Screen Options" at the top of the page**

Scroll down to the WP Page Refresh section and enter your affiliate link into the "Destination URL" field

### WP Page Refresh

The url you specify below is *page-specific*, this means that only *this page* will be redirected on load.

Destination URL:

Delay Time (seconds):

Enter 0 for fastest redirection

Enter a "Delay Time"

### WP Page Refresh

The url you specify below is *page-specific*, this means that only *this page* will be redirected on load.

Destination URL:

Delay Time (seconds):

Enter 0 for fastest redirection

0 means that the page will redirect immediately after it has finished loading. This will be fine for most uses.

Click the "Publish" button

[Publish](#)

**That's It!**

Now you should see a new link on your home page and when you click that, it will redirect through your affiliate link.

**Affiliate Cookie Drop settings: If you want to redirect to a custom page other than the direct affiliate landing page... Select your affiliate link, right click, and select "Cut"**

**Affiliate Cookie Drop**

The link you specify below is *page-specific*, this means that only when someone navigates to *this page*

Affiliate Link:

e.g. <http://affiliateprogram.com/17293876/>

**WP Page Refresh**

The url you specify below is *page-specific*, this means that only *this page* will be redirected on load.

Destination URL:

Delay Time (seconds):

Enter 0 for fastest redirection

- Undo
- Redo
- Cut**
- Copy

Example usage: You can use this Affiliate Cookie Drop plugin to direct link to an order form instead of the sales page if you have already pre-sold the customer.

**Paste that link into the "Affiliate Link" field in the Affiliate Cookie Drop settings**

**Affiliate Cookie Drop**

The link you specify below is *page-specific*, this means that only when someone r
